

Introducing the new XPRO Monopods+ Collection

The new XPRO Monopod+ family of photo and video monopods brings to the market the innovative FLUIDTECH system Base for smooth footage and the possibility to convert photo monopods in video monopods.

Thanks to the improved fluidity and the superior performance of the leg, the XPRO Monopod+ ensure incredibly smooth footage, ultra-sharp photos and creative shooting perspectives.

FLUIDTECH base

KEY BENEFITS:

- **FLUIDTECH Base**

The new Full Fluid Base features a pioneering technological innovation called Fluidtech system that makes Manfrotto XPRO Monopod+ the first of its kind on the market to feature fluidity on all 3 axes. The full fluid video base delivers the ultimate smoothness in an extremely compact solution for advanced video shooting. When panning is priority, 3D rotation can be blocked leaving pan movement free and giving additional control to the shooting. Vertical lock does not guarantee full self standing support when camera is mounted.

Quick Power Lock

- **Quick Power Lock**

Quick Power Lock system ensures extreme locking grip released with the movement of a single hand for a rapid and easy set up.

- **Great ergonomics and portability**

The new aluminium d-shaped tubes together with the leg warmer guarantee excellent ergonomic grip and full control during the movement. The new range introduces also new compact and lightweight «traveler» models, with superior stability and portability thanks to powerful lightweight aluminium & carbon fibre

Ergonomics

- **Versatility from Photo to Video**

The XPRO Monopods+ range is developed to provide high shooting versatility allowing the possibility to change from photo to video application. The FLUIDTECH base can be easily attached to the bottom of the photo monopods by unscrewing the feet.
